

- Agent systems

Let people edit what the AI thinks it knows.

A memory interface worth prototyping.

Said	Keep this comparison short.
Inferred	Prefers short answers.
Scope	This task? All future work?

- Agent systems

Separate the statement from the interpretation.

Statement: “Keep this comparison short.”

Interpretation: “Prefers short answers.”

The second claim is broader. Show the difference.

Said	Keep this comparison short.
Inferred	Prefers short answers.
Scope	This task? All future work?

- Agent systems

Give the memory a scope.

For this task.

For comparisons on mobile.

Across future work.

Let the person choose which one they meant.

Said	Keep this comparison short.
Inferred	Prefers short answers.
Scope	Comparisons on mobile

- Agent systems

Put revision beside the memory.

Edit meaning · Change scope · Stop using
Avoid making people correct a persistent
assumption through another long
conversation.

Said	Keep this comparison short.
Inferred	Prefers short answers.
Scope	Comparisons on mobile

- Agent systems

Show what the correction changes.

Before: every explanation is brief.

After: comparisons stay concise; tutorials can develop the reasoning.

The corrected scope stays visible beside the preference.

Said	Keep this comparison short.
Inferred	Prefers short answers.
Scope	Comparisons on mobile

- Agent systems

Copy the memory card.

Statement: ___

Current interpretation: ___

Applies when: ___

Last confirmed: ___

Person can change it here: ___

Prototype the disagreement: “What has the product misunderstood about you?”

The answer should have somewhere visible to go.
