

- Ideas & product design

Does the room need another shelf?

Imagine a student room that feels cramped.
The first brief is to design better storage.

What would make this room easier to live in?

- Ideas & product design

Now add one awkward condition.

Nothing can be fixed to the walls. Explore freestanding storage, furniture doing two jobs, or less to store.

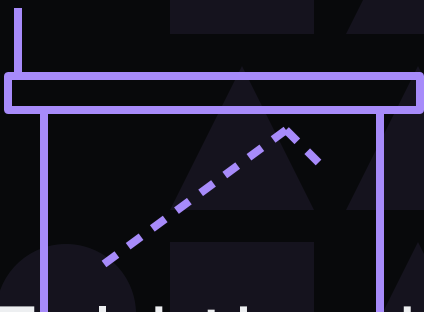

A constraint can open another direction.

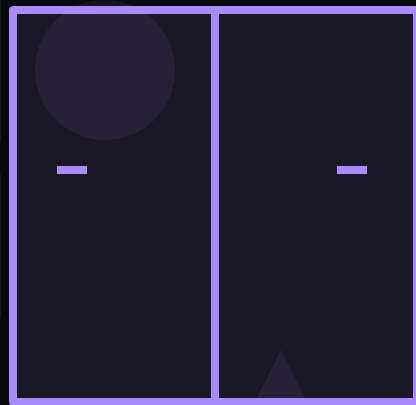

- Ideas & product design

Try different conditions.

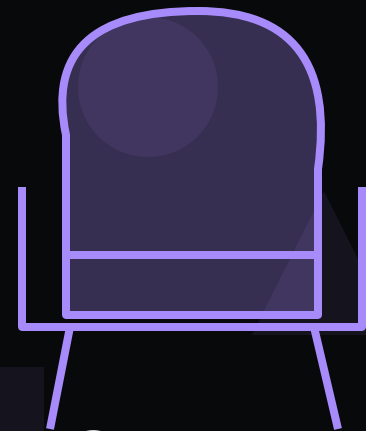

The room must switch from work to sleep.
Rarely used items can be shared. Each brief gives an agent another direction to explore.

Fold the desk

Share storage

Comfort

Different ways to improve the same day.

- Ideas & product design

Researchers tried varying the brief.

In product-idea experiments, different user perspectives and design constraints broadened the ideas generated.

Illustrative briefs; study used GPT-4o.

- Ideas & product design

Compare what changes for the person.

More space, less daily rearranging, somewhere comfortable to sit. Keep ideas that improve life in this particular room.
