

- Agent systems

Keep the interesting part.

Imagine an AI helping you make an exhibition. Which choices would you want to keep?

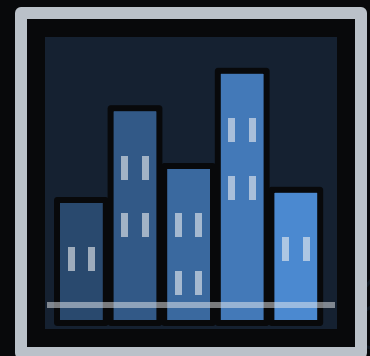

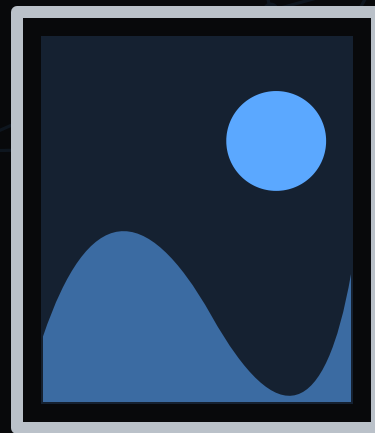

An exhibition is more than its logistics.

- Agent systems

The work around the work.

Resizing images, preparing labels, checking delivery dates: useful work an agent can take on.

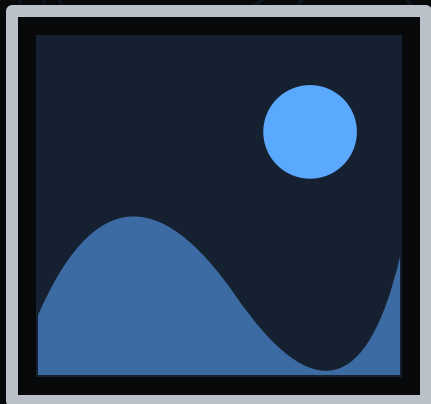

More room to think about the arrangement.

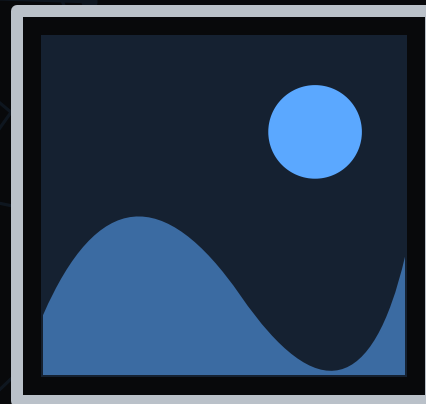

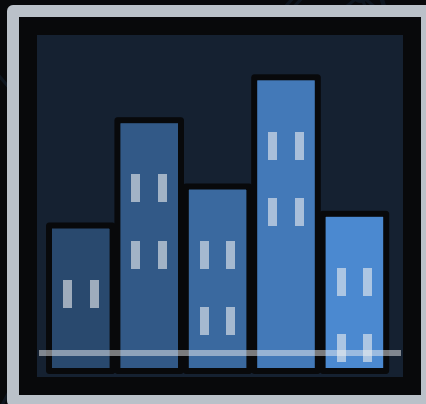

- Agent systems

The choice that makes it yours.

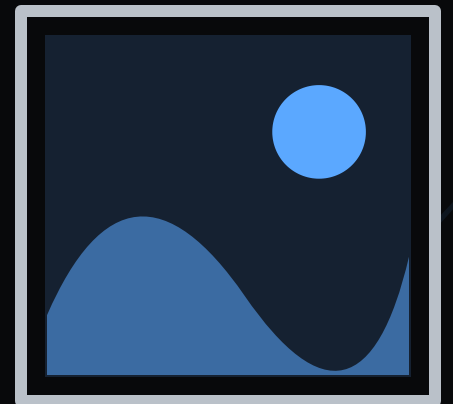

A landscape beside a busy street, or beside another quiet view. Which conversation belongs on the wall?

Contrast

Continuity

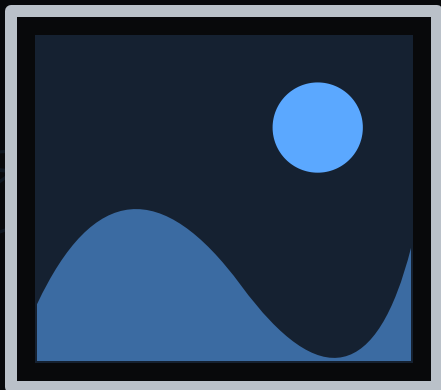

Several arrangements are worth exploring.

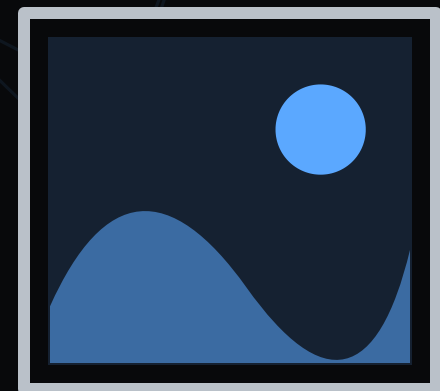

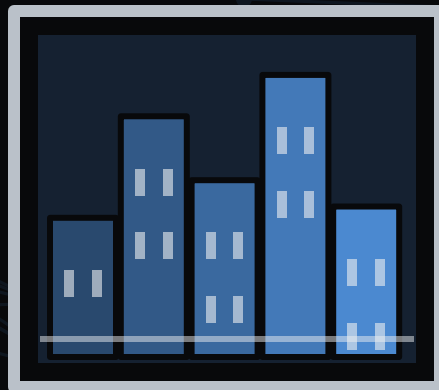

- Agent systems

Choose how to join in.

An agent could handle logistics and bring promising arrangements. Explore together, change direction or delegate more.

Explore together

Delegate

Participation can be part of the brief.

- Agent systems

Make room for work people enjoy.

Mollick argues for involving people when a choice is interesting, as well as when permission or expertise is needed.
